

Our Safety Charter

The six pillars of your adventure

At 4WD Vietnam, we believe that the thrill of discovery should never come at the expense of safety. Our expeditions are designed to push boundaries while remaining anchored in a culture of rigorous risk management.

Safety over schedule

In all situations, safety is our absolute priority. The Expedition Leader holds final field authority to adjust the route, delay, or cancel segments based on real-time conditions

01

Expert supervision

Every expedition is led by professionals trained in remote navigation and advanced recovery techniques. They are supported by a skilled technical crew to ensure the integrity of your journey.

02

Proactive planning

We don't just react to terrain; we analyze it. From systematic pre-trip vehicle inspections to on-foot scouting of critical trail sections, we anticipate challenges before they arise.

03

Connected support

Even in remote areas, our field teams remain in constant communication with our 24/7 base-office, ensuring that backup and logistical support are always just a call away.

04

Emergency prep

We operate with established regional evacuation protocols and maintain direct links to top-tier medical facilities for any urgent care required.

05

Shared responsibility

Your safety is a partnership. We provide the expertise and the infrastructure; in return, we ask our guests to drive within their limits and respect the guidance provided by our leaders.

06

"Safety is not just a rule, it's our promise."

Your personal expedition checklist

To ensure a smooth and safe journey, please prepare the following for your trip

Section 1 : Administrative & Medical

- Valid International Medical Evacuation Insurance (Mandatory)
- Personal medical records & any specific prescription medications
- Valid driver's license (original)

Section 2 : Gear & Comfort

- Sturdy, closed-toe footwear for trail walking/scouting
- Weather-appropriate clothing (layers are essential for mountain sectors)
- Hydration system (reusable bottle/bladder)
- Personal items: Sunglasses, sunblock, insect repellent

Section 3 : Safety Mindset

- Read and understand the Client Safety Briefing (see page 3)
- Confirm emergency contact person with our staff

Safety Briefing: Before we depart

- Convoy Rules:** Follow lead guide order; safe spacing; no overtaking
- Technical Zones:** Do not exit the vehicle in a recovery zone unless instructed
- Reporting:** Inform the guide immediately about any injury, fatigue, or vehicle issue
- Environment:** Respect village speed limits, local communities, and private land
